

Summary

Senior Software Developer with 5+ years building and shipping scalable web and mobile products across React, React Native, Node.js, and Laravel. Currently leading a team of up to 6 developers, owning delivery end-to-end from client requirements and architecture through deployment. Proven at working directly with clients — from winning new business in technical pre-sales to gathering requirements on-site — and translating them into reliable, maintainable software. Builds and runs production SaaS platforms on AWS.

Experience

Senior Software Developer

Apr 2023 – Present

Onexfort, Chennai, Tamil Nadu

- Lead a team of up to 6 developers across multiple web and mobile products (Onexfort, GetRostered, Weaver, BOS, Moverflow), overseeing architecture, code reviews, sprint planning, and delivery timelines.
- Shipped 3 mobile applications to the iOS App Store and Google Play, managing the full release process and store compliance.
- Worked directly with clients on-site (BOS) to gather business requirements first-hand, then translated them into technical roadmaps and a working application.
- Architected and deployed applications on AWS using EC2, ECS, RDS, Cognito, S3, Amplify, Security Groups, and QuickSight, improving scalability, security, and reporting.
- Integrated LLM APIs (OpenAI, Anthropic) to build AI-powered features into production web and mobile applications, including the AI-native BOS platform.
- Integrated third-party services into web and mobile apps — Stripe payments, Google APIs (Maps, Places, OAuth sign-in, Calendar, reCAPTCHA) and Firebase.
- Built real-time messaging and notification features using WebSockets across several Onexfort products.
- Established and enforced engineering standards including CI/CD pipelines, Git-based version control, and Agile workflows.

Full Stack Developer

Mar 2021 – Apr 2023

ZeroSoft Technologies, Tuticorin, Tamil Nadu

- Served as the technical point of contact in client pre-sales calls and interviews, validating requirements and demonstrating the team's technical fit — converting 8 out of 10 prospective clients into signed projects.
- Developed single-page web applications and REST APIs using React, Node.js, PHP (Laravel, CodeIgniter), and MySQL, taking projects from requirement to deployment.
- Led small project-based teams of 2–3 developers in the second year, coordinating tasks and delivery alongside hands-on development.
- Updated and enhanced 2 existing mobile applications, adding new features and maintaining API integrations using the CodeIgniter framework.
- Drove performance optimization across web applications, achieving up to a 40% improvement in application load time.
- Delivered client projects independently, owning development, testing (via Postman), debugging, and deployment.

Key Projects

Onexfort

Laravel · React · React Native · MySQL · AWS

SaaS platform offering CRM, job management, scheduling, quoting, and invoicing for removalists, cleaning services, and electricians, with S3 storage and QuickSight analytics.

GetRostered

Laravel · React · React Native · MySQL · AWS

Workforce and business portal for real-time talent management and scheduling, with Cognito authentication and QuickSight-powered reporting.

BookaRemovalist

React.js · Laravel · PostgreSQL

Australian online marketplace connecting people and businesses with vetted removal companies to get, compare, and book quotes from multiple removalists in one place.

BOS

Next.js · Python · PostgreSQL

AI-native business operating system that unifies CRM, ERP, inventory, manufacturing, and HR into a single platform, replacing disconnected tools. Requirements gathered on-site with the client.

Zeg Het Met Duiten

React · Node.js · GraphQL · Prisma

Corporate gifting marketplace with customizable and sustainable options; delivered enhancements, bug fixes, and new features on a scalable web application.

Credence Community Capital

Angular · CodeIgniter · MySQL

Internal loan-management software for viewing loan details and paying monthly dues, with a user-friendly interface and a secure backend for reliable transactions.

Technical Skills

Frontend — React, Next.js, Angular, JavaScript, HTML, CSS, jQuery

Mobile — React Native

Backend — Node.js, PHP (Laravel, CodeIgniter, CakePHP), Python, REST, GraphQL

Databases — MySQL, PostgreSQL, MongoDB

Integrations — Stripe, OpenAI & Anthropic (LLM) APIs, Google APIs (Maps, Places, OAuth, Calendar, reCAPTCHA), Firebase, WebSockets

Cloud / DevOps — AWS (EC2, ECS, RDS, Cognito, S3, Amplify, QuickSight), CI/CD, Git

Practices — Agile, code review, client requirements, team leadership

Education

MCA — Master of Computer Applications Alagappa University, Tamil Nadu · Distance 2021 – 2023

B.Sc — Computer Science V.O. Chidambaram College, Tamil Nadu 2017 – 2020
